

Stone & Trent Valley Opposed to Severn Trent Water

STOPstw artists impression of how the wind farm may appear, from Southern end of the "Burston trail". Each turbine is 132m (433ft) high, just shorter than Blackpool Tower and with a blade diameter greater than the wingspan of a Boeing 747 Jumbo jet. As a comparison, the incinerator chimney on the A500 in Stoke is just 76m tall!
